Josua Boon

AI Automation Engineer - Cybersecurity Analyst

AI automation and cybersecurity professional with a background in SOC operations and SIEM monitoring (Splunk). Experienced in threat detection, incident analysis, and improving monitoring and alerting processes. Entrepreneur and owner of a small business in Bali, combining technical expertise with a hands-on business mindset. Building AI-powered automation systems using Make.com and APIs to turn data into actionable business insights, while actively developing skills in LLM-based solutions.
Based in Bali, Indonesia, open to remote or international opportunities.

Bakso Kotak Niken, Denpasar, Bali
Owner and Investor | 2024 – Present
Sole owner and investor, managing all aspects of a successful restaurant specializing in traditional Indonesian bakso. Oversaw the restaurant's construction from planning to completion and handle all administration, marketing, and strategy to increase visibility and grow the customer base.

Sociale Verzekeringsbank (Dutch government)
Cybersecurity Analyst (SOC) | 2019 – 2023
The Security Operations Center (SOC) offers monitoring, log management, and a range of security services to SVB's internal clients. Our main responsibilities include monitoring and administering security technologies such as SIEM, IPS, Next-Gen Firewalls, Vulnerability Management, and antivirus software. We continuously strive for improvements in threat detection, alerting, prevention, and automation.

Sociale Verzekeringsbank (Dutch government)
Monitoring Specialist | 2016 – 2019
Responsible for proactively identifying disruptions in the infrastructure of the SVB. Identifies and analyzes occurring events (event management) and determines their impact and priority. Providing insight into the SLAs and KPIs related to the Business Services and ICT components that are monitored by the MOC and the measurability of this through the various monitoring tools.

Fiber Nederland
Operations Specialist | 2015 – 2016
Performs various operational tasks, including resolving complex disruptions on the copper and fiber optic network and representing the organization in the Disputes Committee. Manages tasks such as network migrations and relocations, and supervises and directs the technical helpdesk of the service center.

KPN
NOC employee (Network Operations Center) | 2013 – 2015
Involved in various projects using the Agile Scrum methodology. Works to improve efficiency through the development and implementation of new working methods. Begins each day with a presentation using the WOW (way of working) method. Resolves fiber optic network disruptions in accordance with SLA and KPI agreements.

Online.nl/ HQ T-Mobile Nederland
Technical Engineer | 2013 – 2015
Participate in various projects within the ADSL team. Taking care of the distribution of work among colleagues.
Solving disruptions on the ADSL and VDSL network.
